

AN INVITATION TO APPLY FOR OUR COMMUNITY HOUSING RETROFIT PROGRAM

South East Water, City West Water and Yarra Valley Water in partnership with the Department of Environment, Land, Water and Planning (DELWP) are pleased to offer the Community Housing Retrofit Program (CHRP).

The program offers funding to not-for-profit organisations to improve water efficiency in the housing they provide to vulnerable people in our communities. We understand that these services have limited funds available and this assistance is aimed at saving water and reducing costs.

CHRP provides assistance to emergency and community housing organisations to repair leaks and repair or replace faulty water appliances across Victoria.

Eligible organisations include, but are not limited to, refugee housing, domestic violence shelters or short term housing for displaced persons.

Some of the retrofit works available under this program are:

- Showerhead replacement
- Repair or replacement of single flush toilet suites
- Leak detection
- Leak repair, including underground pipes and internal appliances and fixtures
- Hot water service adjustment repair and/or replacement
- Water and energy efficient appliance replacement such as washing machines and dishwashers
- Additional related plumbing works

To find out more or to check your eligibility, please call our program coordinator on **0417 743 560**
